

Helping your patients
stay independent.

VaPro Range of Intermittent Catheters

Putting your patient in control of their individual lifestyle

Three **VaPro** products available only one technique to teach

3 × **VaPro**
1 technique to teach

At Hollister we realise that your patients are individuals and have different lifestyles and needs.

That's why the **VaPro** range of Hydrophilic Intermittent Catheters from Hollister now includes 3 different options so your patients are able to mix & match to suit their individual lifestyles.

All 3 **VaPro** products use the same technique which makes them easy to teach and easy to learn whatever option your patient chooses.

VaPro

Touch Free Hydrophilic Intermittent Catheter

- Ready to use with pure catheter hydration technology
- Designed to be evenly lubricated for a more seamless experience
- Helps provide trouble-free insertion and withdrawal with ultra-smooth eyelets
- And it's the only hydrophilic intermittent catheter with a protective tip and sleeve

VaPro Pocket

Touch Free Hydrophilic Intermittent Catheter

Offers all the benefits of the standard VaPro Catheter, with the added advantage of an easy-to-carry package which provides better convenience and storage - only 14 x 10.5cm

Once trained on VaPro a similar technique is used with VaPro Pocket.

VaPro Plus

Touch Free Hydrophilic Intermittent Catheter System

Offers all the benefits of the standard VaPro Catheter, with the added advantage of an integral 1000ml collection bag.

Once trained on VaPro a similar technique is used with VaPro Plus.

Giving your patients control

Simon loves nothing more than being outdoors, he's not one to be inside for very long at all.

His job is very demanding physically, so when he's not working in the woodlands he likes to take time with his young family and enjoys hiking in the the countryside and camping adventures abroad.

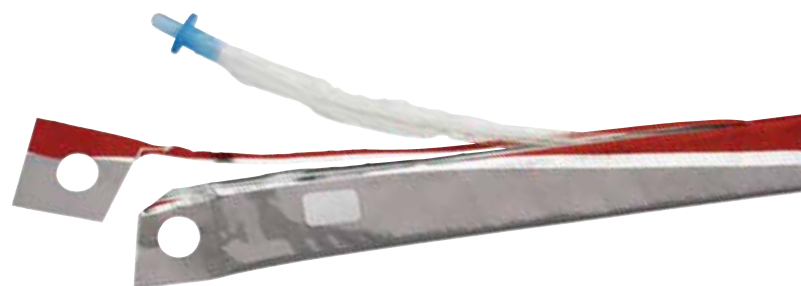

Simon, Woodland Ranger

Simon Chooses:

VaPro Pocket & VaPro Plus

- Simon finds the easy-to-carry package of the **VaPro Pocket** gives him the flexibility when he is out and about for work or socially.
- The integral 1000ml collection bag of **VaPro Plus** is very handy for Simon when he is at work, sometimes he can be miles away from any toilet facilities or up a tree for hours on end. He likes the freedom and convenience that the **VaPro Plus** offers.

Putting your patients in control

Russell, Finance Analyst

Russell has a very busy and active life. He works in the city and enjoys a range of sports.

Having any down time is rare for Russell as he and his fiancé are planning their wedding later in the year.

Russell Chooses:

VaPro & VaPro Pocket

- The original **VaPro** catheter is what Russell uses at home. It is available to use straight from the package in his bathroom.
- The easy-to-carry package of the **VaPro Pocket** provides a compact discreet option when he is out either playing sport or shopping.

of the choices they make...

George is a retired factory worker who has a summer house in Spain. He spends most of the year in the UK and the rest in Spain.

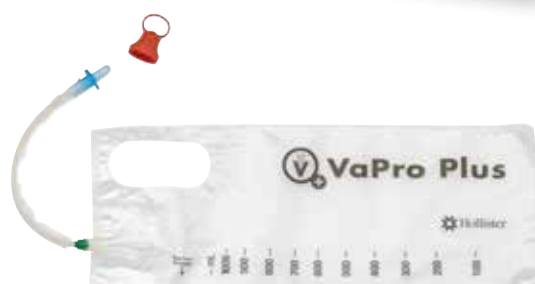

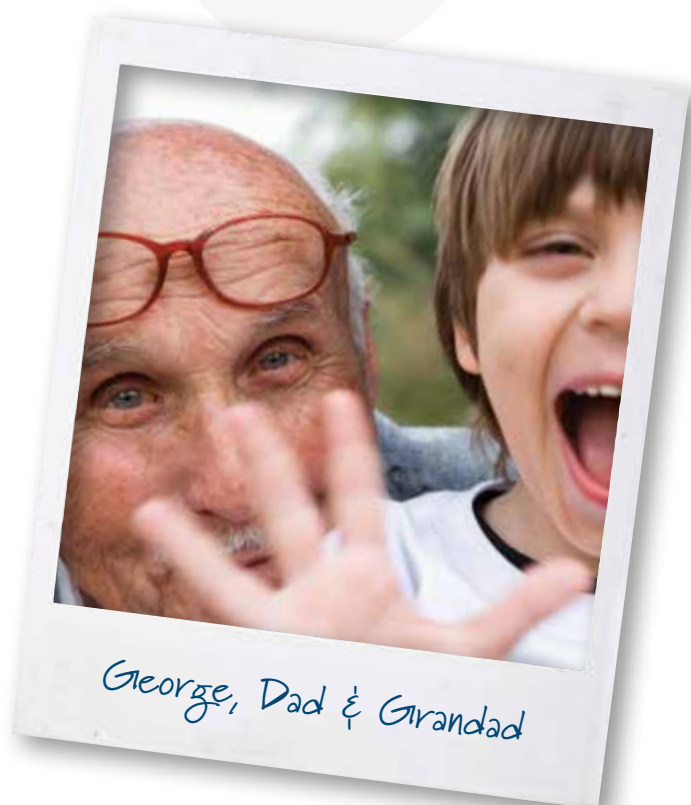

When he is in the UK, he fills his time with his family and his other love in life, gardening.

George Chooses:

VaPro & VaPro Plus

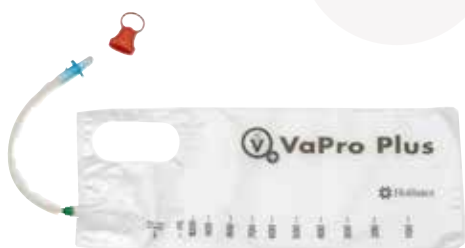

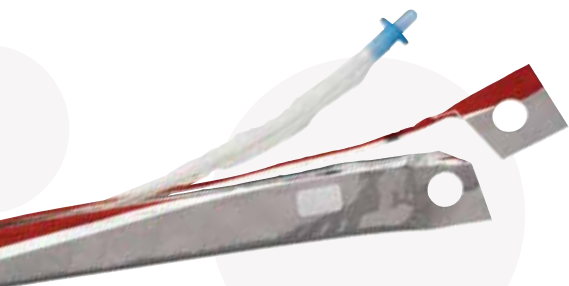

- George chooses **VaPro** as it is ready to use with pure catheter hydration technology. Storage is not a problem as he has plenty of room at home where he spends the majority of his time.
- **VaPro Plus** offers George all the benefits of the standard VaPro Catheter, with the added advantage of an integral 1000ml collection bag. This offers him peace of mind as there may be a lack of toilet facilities while he is travelling.

The **VaPro** family of Intermittent Catheters
